

2023 GP1800R SVHO

The impressive racing-inspired GP1800R SVHO goes beyond the definition of extreme thanks to its supercharged ultra-powerful 4 cylinder 1.8L SVHO engine. Its lightweight hull and slim design together with cornering precision make this a pure adrenaline machine ready to cut the waves like no other.

No-compromise performance.

As the flagship of the GP family, the GP1800R SVHO is a class-leading model thanks to an array of engineering innovations that make riding it an instant power blast. It also inherits the signature Yamaha features like the new lightweight NanoXcel2® hull and deck - and our revolutionary RiDE® control system. Our attention to detail goes even further: race-designed top-loader intake grate, ride plate which improved handling, cornering and rough water hook-up, lower centre point of gravity, new ergonomic seating and handlebar designs - all these for superb control.

2023 GP1800R SVHO - BITNE KARAKTERISTIKE

Lightweight hull and body for top performance

Made possible by Yamaha's unique materials technology, NanoXcel2® is an impressive 18% lighter than our revolutionary NanoXcel® - yet just as rigid and strong. It maximises the exciting performance of both the new GP1800R models, helping it deliver its sensational acceleration, even sharper cornering - and more stability at high speed.

Race-inspired ergonomics

The balance and stability of the GP1800 has been enhanced by lowering and centralising the centre of gravity along with the adoption of a narrower design for both the seat and the fully adjustable, race-design handlebar. Combined with the ergonomic sitting position and deeper footwells, the result is an amazing level of rider control.

Race-inspired pump design

Improving both acceleration and handling, the pump, impeller and intake grate have been introduced as a result of the excellent results achieved in racing. The extra grip it gives on the water makes for even more responsive and accurate handling in all conditions.

Auto-trim function

This exclusive, industry-first system offers a fully automatic trim function, which operates independently of the efficient electronic trim control on the handlebar. When engaged, Cornering Control automatically shifts the trim down when decelerating for sharp cornering - Launch Control shifts the trim down to prevent bow rise when accelerating quickly.

RiDE® system (Reverse with Intuitive Deceleration Electronics)

The revolutionary RiDE system transforms your riding pleasure, bringing a feeling of confidence to every rider... at every level. Simply pull the throttle lever on the right hand-grip to move forward and accelerate - pull the lever on the left grip to slow down or to reverse. Yes, it's really that simple!

Supercharged, DOHC, 16V 1,812cc engine

The 4-cylinder DOHC 1.8 litre engine (supercharged in this new GP1800R SVHO) is the largest displacement in the industry, yet thanks to our continuous programme of innovation and product improvement, it is extremely compact. The result is astonishing power, acceleration and huge torque, along with clean efficiency and economy.

Race-inspired adjustable steering

The new, adaptable steering system has exposed handlebars that are tilt-adjustable. A new, narrower race-inspired design has been used for the bar itself, along with the very latest control boxes and grips, to provide even more confident control for the rider.

4.3" multi-function colour display with fast access

Among its many talents, this clear and easy-to-read display helps you control and monitor all the systems on board, using the fast-access buttons next to the unit. Top speed and acceleration limits can also be entered from here - along with the PIN code-activated learning (L-mode) and security settings. We put the latest technology to work for you!

Extensive and practical storage facilities (114 Litres)

The latest GP1800 models have ample amounts of stowage space so that you can take everything you might need along with you. In addition to the huge under-seat and bow storage compartments, there's a very large and convenient glove box.

Extended rear platform and towing hook

The GP1800R SVHO will really appeal to water sports fans as well as speed enthusiasts, with its comfortable three-person seat, large integral mirrors, extended rear platform with large, soft-touch re-boarding step - and its strong, practical tow hook. Comfortable, slip-resistant Hydro-Turf mats are another pleasure to look forward to after swimming with friends.

2023 GP1800R SVHO - TEHNIČKA SPECIFIKACIJA

Engine

Engine type	Supercharged 4-cylinder, 4-stroke, Super Vortex High Output
Lubrication system	Wet sump
Supercharger	Yes
Displacement	1,812cc
Bore x stroke	86mm x 78mm
Compression ratio	8.5 : 1
Pump Type	160mm axial flow
Fuel	Unleaded premium Gasoline
Fuel supply system	Electronic Fuel Injection
Fuel capacity	70L
Oil capacity	5.3L

Dimensions

Length	3.35m
Width	1.24m
Height	1.2m
Dry weight	342kg

Features

Storage Capacity	107.6L
Rider capacity	1-3 persons

Ograničenje opterećenja

Storage Capacity	107.6L
Rider capacity	1-3 persons
