

2025 VX DeLuxe

Whether you're piercing through the waves, or gently cruising across the bay, the latest VX DeLuxe delivers ultimate versatility and enjoyment on the water. The 3-cylinder, 4-stroke TR-1 High Output Yamaha Marine engine provides plenty of excitement, combined with a whole range of great features and functionality to enhance your riding pleasure. And with its sporty silhouette complemented by striking blues and on-trend graphics, you'll look as great as you feel.

Live life to the luxe.

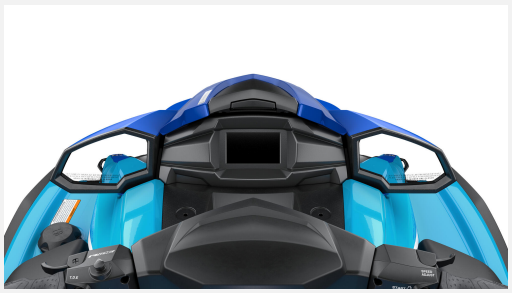

Versatility tops the charts of the many factors that make the VX models our most sought-after personal watercraft. An impressive performance repertoire that takes you from the adrenaline-pumping excitement of water sports to relaxed explorations of charming waterways and hidden coves inspires enduring loyalty. The latest VX DeLuxe is a stand-out premium watercraft, delivering a potent blend of high-performance excitement, precision handling, riding comfort and outright style. Now with a lightweight NanoXcel2® deck, the VX DeLuxe is a sure bet for the ultimate riding experience.

2025 VX DeLuxe - BITNE KARAKTERISTIKE

RiDE® system (Reverse with Intuitive Deceleration Electronics)

The revolutionary RiDE® system transforms your riding pleasure, bringing a new feeling of confidence to every rider at every level. Simply pull the lever on the right hand-grip to move forward and accelerate, and pull the lever on the left grip to slow down or reverse. With the bonus of Reverse Traction Control, it really is that simple.

4.3 inch multi-function colour display with fast access

Among its many hallmarks, the easy-to-read Connext® display helps you control and monitor all the systems on board, using the fast-access buttons below the handlebar. Top speed and acceleration limits can also be entered from here, along with the PIN code, activated learning and security settings. We put the latest technology to work for you.

Easier re-boarding with redesigned steps and more grips

The latest VX DeLuxe will appeal to water sports fans, with its large dual mirrors, an extended rear platform with an enhanced, more comfortable re-boarding step, and a strong tow hook. The stylish, comfortable, slip-resistant Hydro-Turf mats are another bonus safety feature to look forward to after going for a swim.

High Output, DOHC, 16V, 1,049cc engine

The VX DeLuxe is powered by our newest innovative High Output, 1,049cc WaveRunner engine. This remarkable machine packs a real punch and offers extraordinary acceleration and great top-end power yet with economy and comfort features integrated.

Extensive and practical storage facilities

The latest VX DeLuxe has 114 litres of storage space so that you can take everything you might need along with you. Not only do we ensure plenty of space under-seat and bow storage, but in addition, the very large, watertight glove box has blue LED accent lighting, USB and 12V outlets to secure and charge your phone.

Sleek, modern design and striking graphics

We wanted the latest VX DeLuxe to look good as well as feel good, so we’ve added a powerful, and attractive graphics scheme that’s sure to catch the eye as you blast across the water. With the stunning colours and modern design, it's sure to look great at the dock too.

Comfortable seat design and optimum handling

Both the super-comfortable three-person cruiser seat and the handlebar of the VX DeLuxe are narrower designs which provide an excellent ergonomic sitting and driving position. Together with the deeper, wider footwells and redesigned grips, this gives (especially to short riders) great control over the handling.

Unique electronic systems for maximum control

Yamaha's very latest electronic systems come as standard on the latest VX Series and deliver a stunning mix of rider benefits and advantages. They include convenient electronic reverse with traction control, Cruise Assist, No Wake Mode, and our security system with Low-RPM ‘Learning’ Mode.
