

2025 FX Cruiser SVHO

Looking for adrenaline-pumping action or relaxed adventures? The FX Cruiser SVHO has it all, in a striking all matte black colour for an understated yet aggressive look, or sophisticated white which looks amazing on the waves. Open the throttle and you'll discover an impressive sports machine ready for extreme performance or just go smooth and enjoy the scenery with the best cruising features and innovations.

All the thrills, all the chill.

Awesome performance, and incredible handling. The supercharged Yamaha SVHO engine works beautifully with the sleek body shape and lightweight hull to deliver awesome performance with stable, agile handling, all being complemented by our revolutionary and intuitive-to-use RiDE® control system.
The cutting-edge all-electronic control systems make the FX Cruiser SVHO a leader in comfort, convenience and control, with features like Cruise Assist, three-position No-Wake Mode, electronic reverse and T.D.E. (Thrust Directional Enhancement Control), and theatre-style seating for three.

2025 FX Cruiser SVHO - BITNE KARAKTERISTIKE

Extra features as standard

Enjoy extra features as standard on the FX Cruiser SVHO. Flush-mounted, pop-up cleats allow for simple, stress-free moorings in marinas or when picking up a mooring buoy, and the premium graphics and colour scheme are also a real head-turner.

30% more storage

Yamaha have designed 30% more easy-access storage into our FX models so your adventures can be longer and take you further. There are cleverly integrated, practical storage solutions all around: a very large watertight glovebox compartment, generous storage under the seats, at the bow and stern.

Unique, simple-to-use security system

With this innovative system there's no separate remote control to worry about. Just use a PIN code to set and unset your security and control modes via a touch on the Connext® display screen.

Supercharged, DOHC, 16V, 1,812cc engine

The amazing SVHO® (Super Vortex High Output) engine produces smooth, flexible power and features highly efficient cooling and air intake systems as well as strong engine internals. The large hyper-flow jet pump helps turn that power into electrifying acceleration and the Electronic Fuel Injection (EFI) provides smooth and efficient power output.

Yamaha Music integrated audio system

The integrated factory-installed audio created by Yamaha Music means speakers are bigger than previous models and come with a sleek design and integrated speaker boxes. With the new audio system, the sound quality is also elevated to new heights. As you speed up or slow down, the volume, treble, and bass automatically adjust, adapting to the surrounding sonic environment, and enhancing listening pleasure.

Enhanced Drive Control Modes

Intuitive riding experience through the new Connext® display featured Enhanced Drive Control modes: Economy, Towing, Performance, Comfort, and Custom. The last allows you to pre-set a top-speed limit and an acceleration curve, making it the perfect partner for novice riders. Set a steady speed on longer trips for maximum economy.

Seven inch colour touch screen display

See the bigger picture in full colour on the largest screen we offer on a WaveRunner. It's GPS map-ready and complete with smartphone synchronisation.

Luxury, comfort, footwell drainage and easier re-boarding

From four-step, tilt-adjustable steering to a luxury three-person cruiser seat; from practical handlebar tie points to a large swim platform with a deeper, wider, softer, more comfortable step and dual handles for re-boarding; the FX Cruiser SVHO really does have it all. It even has an industry-first footwell drainage system.

Electronic trim system

This remarkable system offers complete control of the trim position on the fly. Using the two buttons by the left hand grip, simply click the trim in to pull a tight turn, and click out again to blast away. The clear read-out of the trim position while on the move is another feature of the stylish latest Connext® colour display.

Aerodynamic shape

The capable hull of the FX Cruiser SVHO® model cuts through the water, providing stability on any offshore adventure. Impressively rigid and robust, it gives these machines awesome on-water performance with stunning acceleration, higher top speed, greater economy and an even more comfortable ride.

Electronic control

Our sophisticated electronic control system will delight you with its 'intelligent' features. Use Cruise-Assist to set and maintain exact speeds, the three-position No Wake Mode to navigate through low-speed areas and electronic Reverse-Assist and T.D.E. (Thrust Directional Enhancement) for ultra-low speed manoeuvring and docking.

2025 FX Cruiser SVHO - TEHNIČKA SPECIFIKACIJA

Engine

Engine type	Supercharged 4-cylinder, 4-stroke, Super Vortex High Output
Supercharger	Yes
Displacement	1,812 cc
