

Tricity 155

Love the way I move.

Everything about this agile and manoeuvrable urban commuter is designed to make commuting enjoyable and affordable. Its spacious footboard and contoured dual seat give a natural and relaxing riding position - and the beautifully styled bodywork and screen help protect you from the wind and weather.

Stay connected when you're on the move by downloading Yamaha's MyRide app to your smartphone and view real time notifications of incoming calls, social media, emails and texts on the LCD instruments. And with its lively and economical 155cc Blue Core engine, you've got the power to arrive ahead of schedule every time.

Tricity 155 - BITNE KARAKTERISTIKE

155cc Blue Core engine

Tricity 155 is driven by a 155cc liquid-cooled 4-stroke engine. Featuring Yamaha's Variable Valve Actuation (VVA) technology for strong acceleration, this quiet-running low-emission powerplant develops 11.1kW for lively performance and a good cruising speed on the highway.

Optimized 3-wheel layout

Tricity 155's twin leaning front wheels give you enhanced feelings of stability on bends and bumpy roads – and being one of the lightest and most compact 3-wheel scooters, it's so agile and easy to manoeuvre. The latest model benefits from a refined LMW Ackermann steering system that gives a more natural and confident feeling when cornering.

Compact, lightweight aluminium chassis

Once you've experienced the Tricity 155 you'll never want to go back to public transport! Its frame has been designed to ensure even higher levels of riding comfort, and the increased strength of the chassis gives a natural handling feeling that makes the Tricity 155 a joy to ride.

Start & Stop engine technology

For increased riding enjoyment in urban traffic the Tricity 155 is equipped with an intelligent Start & Stop system. When you are stationary at traffic lights the engine automatically stops – saving fuel and reducing emissions. As soon as you twist the throttle the scooter starts automatically for an easy and relaxing ride – even in congested traffic.

Twin shock rear suspension

As well as being easy to use, the Tricity 155 is also one of the most comfortable scooters thanks to its rear suspension. Longer rear shock absorbers soak up the bumps for smooth and stable riding – whether you're solo or carrying a passenger.

Front and rear disc brakes with ABS

For strong and reliable braking performance the Tricity 155 is equipped with dual 220mm front disc brakes as well as a 230mm rear disc brake. This ABS-equipped system gives you the feel and controllability you need for stop/start urban riding.

LCD instruments with smartphone connectivity

When you're riding the Tricity 155 you can view real time notifications of incoming calls, social media, emails and texts on the LCD instruments with smartphone connectivity. All you need to do to get connected is to download Yamaha's free MyRide app to your smartphone, pair it with the scooter using the VIN and you're connected!

Smart Key keyless operation

Tricity 155 ownership is all about comfort and convenience, and with its Smart Key keyless ignition you'll never have to mess around looking for keys again! As long as you have the Smart Key with you in a pocket, bag or wallet you can get moving in seconds.

Large footboard area

With its large footboard area there's enough space for your feet, enabling you to find the most comfortable riding position. The Tricity 155 is also equipped with passenger footrests that are easier to flip out from their folded-in position.

LED headlight with broader beam

For excellent night time visibility the powerful LED headlight is equipped with a redesigned reflector that gives a broader spread of light at low and high beam.

Parking brake

For added security when parking on uneven or sloping spaces the Tricity 155 is fitted with an easy to operate parking brake.

Underseat storage with LED lighting

Simply flip up the comfortable dual seat and you can access the spacious storage compartment that's ideal for carrying personal items when you're riding - or storing most models and sizes of helmet* when parked. For convenience it's automatically illuminated by an LED light. (*Depending on the shape of the helmet, certain models may not fit.)

Front pocket with power socket

Tricity 155's front pocket offers quick and easy access to personal items - and there's also a power socket to keep your smartphone charged when you're on the move.

Tricity 155 - TEHNIČKA SPECIFIKACIJA

Motor

Engine type	4-stroke, Liquid-cooled, SOHC, 4-valves, Single cylinder
Displacement	155 cc
Bore x stroke	58.0 × 58.7mm
Compression ratio	11.6:1
Maximum power	11.1kW @ 8000rpm
Maximum Torque	14.0Nm @ 6500rpm
Lubrication system	Wet sump
Fuel system	Fuel Injection
Ignition system	TCI
Starter system	Electric
Transmission system	V-Belt Automatic
Fuel consumption	2.5L/100km
CO2 emission	57g/km

Šasija

Front suspension system	Telescopic fork
Front travel	90mm
Rear suspension system	Unit Swing
Rear Travel	90mm
Front brake	Hydraulic disc brake
Rear brake	Hydraulic single disc brake
